PROFESSIONAL SUMMARY

Frontend-focused developer with hands-on experience building responsive, interactive web interfaces using React, JavaScript, HTML5, and CSS3. Experienced in integrating REST APIs, handling structured JSON data, and ensuring reliable data flow between backend services and user-facing components. Strong problem-solving mindset with attention to usability, performance, and code quality. Comfortable collaborating in team environments and communicating clearly with non-technical users. Currently expanding into templating languages including Liquid.

TECHNICAL SKILLS

Frontend:	JavaScript (ES6+), React, HTML5, CSS3, Bootstrap
Web Development:	Responsive design, REST API integration, JSON data handling, CSS animations
Tools:	Git (feature branching, code review), Node.js, Linux (command line)
Data & Backend:	Python (pandas, NumPy), SQL (PostgreSQL), data processing
Learning:	Liquid templating (self-study)

PROJECT EXPERIENCE

Personal Portfolio Website

2025

React · JavaScript · CSS3 · Bootstrap · HTML5

- Designed and built a fully responsive single-page portfolio using React, featuring smooth scroll navigation implemented with React hooks and a sticky navbar with section jump links
- Developed interactive UI components including CSS hover animations, dynamic floating image effects, and Bootstrap modal popups triggered by project card clicks
- Focused on usability and visual polish, ensuring consistent layout and interaction behaviour across screen sizes

Interview Practice Chatbot – Graduate Course Project

University of Ottawa

React · Node.js · PostgreSQL · REST API · Bootstrap · Git

- Built a responsive React frontend that consumed Node.js REST APIs to fetch and render structured Q&A data from a PostgreSQL database
- Processed and validated JSON API responses to ensure consistent, accurate data display across all components
- Implemented error handling to maintain a reliable and user-friendly interface under varying data conditions
- Collaborated in a team environment using Git for version control, feature branching, and code review

ECG Atrial Fibrillation Detection – IEEE Published

2022

Python · pandas · scikit-learn · Data Processing

- Developed a complete data processing workflow transforming 8,528 raw ECG recordings into clean, structured, analysis-ready datasets
- Resolved real-world data quality issues including class imbalance, improving minority-class F1-score from 0.56 to 0.71
- Documented methodology to peer-review standards, demonstrating strong attention to consistency and reproducibility

WORK EXPERIENCE

Customer Service Associate (Part-Time) – Real Fruit Bubble Tea Ottawa, ON | 2024 – Present

- Delivered customer-facing service in a fast-paced environment, handling inquiries and resolving issues in real time
- Communicated clearly under time pressure to understand needs and provide solutions, building skills directly applicable to client-facing technical roles
- Maintained attention to detail while managing multiple tasks simultaneously in a team setting

EDUCATION

M.Sc. – System Science and Engineering

University of Ottawa, Ottawa, ON

B.Eng. – Biomedical Engineering

Hangzhou Dianzi University, China
